

POP Bandage

Formulated to have following features :

1. Cotton fibre weave coated with POP mass which is more sticky & adheres to cloth more.
2. Less powder loss even when dipped in water.
3. Therefore less bandages are required to make a plaster & resultant cast is of light weight
4. Key features :

- i. Low Powder Loss
- ii. Short immersion time
- iii. Creamy Consistency – Thicker, smoother formulation for enhanced coverage and easier application
- iv. Fast setting time
- v. Enhanced strength.
